

UI UX Digital Designer

About the Company

Aruba, a Hewlett Packard Enterprise company and global leader in networking products and services, acquired local startup Cape Networks in 2018. As Cape Networks we had a big vision: to improve the way the Internet works for everyone. We built a small team of skilled engineers and designers in Cape Town and a product that won us Best Startup of the year from Wi-Fi NOW.

Today, our product is the fastest growing in the Aruba portfolio and our Cape Town-based team is recognized as being at the leading edge of design thinking and execution. Now is a unique opportunity to join our growing our team, build new products, and scale our systems to meet a >100x surge in demand during the next 12-18 months.

What do we do?

Our product gives the IT industry insight into how their users are experiencing Wi-Fi, network, and application performance, and helps them fix problems before users complain. Other performance tools are complex and intimidating, built by network engineers for network engineers; ours is beautiful and simple, and our customers love it. Our sensor hardware is a delight to install and our software is easy and fun to use. Our product is used in offices, universities, banks, hotels, airports, stadiums, retail stores, and more - every business with Wi-Fi is a potential customer that we can help.

We design all our own hardware and software in Cape Town. Our software systems are built entirely in-house using Python, React, InfluxDB, and AWS Kinesis and other technologies. We are truly a full stack company, with a great set of technical challenges to work on.

What the role entails

- Work on current designs and design system made in Sketch and Adobe (ie understand the visual language of our dashboard)
- Work on new pages/models/concepts etc. in Sketch → Zeplin/Invision
- Assist with UX process refinement
- Assist with animation/UI movement - prototype using your preferred format
- Work closely with CEO, lead designer, and front-end team

Key attributes

- Able to learn new concepts and business issues quickly
- Able to make logical conclusions, anticipate obstacles, and consider different approaches
- Generate ideas, think outside the box, problemsolving and solution finding
- Decisive and action-driven
- Attention to detail

- Strong visual sense and creative flair
- Digital background

What we are offering

- Excitement and growth of a startup with the resources and security of a Fortune 100 company
- Full-time position
- Competitive salary
- Great benefits
- Exposure to the latest & greatest technologies
- Opportunity to help shape the product
- Growth and global scope
